

The foot stool Palle - Makes shoulders less tense.

Ergonomic solution for persons that need to come up to a appropriate and safe working position, this to offload shoulders, neck and back. Palle is very easy to position, just push it around with your feet.

The mobile footstool is equipped with four castors attached to four stainless steel coil springs. The foot stool chassis is pressed to the floor by the users weight. The platform material is non-slip, stable and safe. Easy to keep clean with a water hose and nozzle.
